Rating Criteria

- [Global Financial Institutions Rating Criteria \(December 2009\)](#)

Other Research

- [Azerbaijani Banks: Back Down to Earth \(October 2009\)](#)
- [Microfinance Through the Crisis \(November 2009\)](#)

Rating Rationale

- The Issuer Default and Support Ratings of AccessBank (AB) are underpinned by support, which could be provided in case of need by its shareholders. The Individual Rating considers the risks of rapid business growth in a difficult operating environment. However, it also reflects the bank's sound asset quality performance during the crisis, solid capitalisation and strong profitability.
- AB continued its rapid expansion in 2009, increasing the loan book by 43% to AZN240m, and growth is expected to remain significant (plan for 2010 – 30%). Micro-lending (up to USD20,000) and small business lending (up to USD100,000) represent the core of AB's business model, accounting for 52% and 23% of the loan book at end-2009, respectively, and resulting in high granularity of the portfolio. Mid-sized loans (above USD100,000) represented 18% of the book and their concentration also remains moderate. Retail lending is limited (7% of the book). Asset quality remains sound: reported one-day and 30-day overdues were 1% and 0.9%, respectively, at end-2009, while impaired loans were reasonably covered by reserves (loan impairment reserves/one-day overdues: 2.8x at end-2009). AB has been managing its growth well, considering immaterial changes in overdues in 2009 and Fitch Ratings does not expect a large increase in this ratio in 2010. However, Fitch notes that rapid growth, the difficult operating environment and the high proportion of foreign-currency lending (71% at end-2009) could all become sources of asset quality weakness in the longer term.
- The funding base is mostly focused on foreign financial institutions (AZN177m or 72% of liabilities at end-2009, including AZN72m from shareholders), but is well diversified by creditors and maturities. Customer funding (mainly retail) tripled in volume in 2009, increasing to 27% of liabilities at end-2009, which Fitch views as a positive in terms of funding diversification. Refinancing risks are mitigated by a good pipeline of committed and scheduled borrowings for 2010, and the role of development institutions among the bank's creditors. Liquidity is comfortable (liquid assets were 14% of total assets at end-2009), supported by long-term diversified funding and strong monthly cash generation (AZN20m).
- Capitalisation is sound: at end-February 2010 (18.3% tier 1 CAR), the bank could have increased the reserves/gross loans ratio to a solid 26% without breaching minimum regulatory capital requirements. AB should remain highly profitable in 2010, meaning that near-term pressure on capital from rapid growth is unlikely.

Support

- Fitch believes AB's international financial institution shareholders would have a high propensity to provide support, if needed; however, Azerbaijan transfer and convertibility risks, as reflected in the Country Ceiling of 'BB+', may limit the extent to which the bank can utilise this support to service obligations.

Key Rating Drivers

- Any movement in the sovereign ratings and Country Ceiling would likely have an impact on AB's IDR. Near-term changes in the Individual Rating are unlikely.

Profile

AB specialises in microfinance lending. It is owned by KfW ('AAA'; 20% stake), EBRD ('AAA'; 20%), IFC ('AAA'; 20%), the Black Sea Trade and Development Bank (20%), Access Microfinance Holding (16.5%) and LFS Financial Systems GmbH (3.5%).
